Excessive cell proliferation is a hallmark of cancer. Understanding the mechanisms that govern this process is essential if we are to design more rational methods of cancer therapy. Recent advances in the field of cell cycle control have pointed to CDK (cyclin-dependent kinase) inhibitors as the primary mediators of cell cycle arrest. While the natural form of p16 can act as a strong inhibitor of CDK4 and CDK6 in a number of different cells, its mechanism of action is not entirely clear. The objective of this proposal is to investigate the function of p16 and CDKs in the regulation of the G1 phase of the cell cycle. Using a combination of biochemical, cell biological, and genetic approaches, we will address questions concerning the structure/function relationship of p16. Specifically, we will test our hypothesis that the critical sites of action of p16 is at the CDK4-p16 protein complex. In addition, we will identify the interacting molecules of p16 and CDK4 and investigate their relative importance in the cell cycle. Finally, we will test the hypothesis that the CDK inhibitor p15 is required for the full activity of p16. These studies should enhance our understanding of the normal function of p16 and the mechanism by which it controls cell proliferation. The results of these experiments will be critical in determining how the functions of p16/CDK4 and p16/CDK6 complexes can be exploited in the treatment of cancer. Likes of Roy Choudhury Contents Why lena?? So this season they've been doing a few different things. There's a problem with finding Lena's dates but let's not go there. What they're doing is having a couple of dates and then a dance coach sends them for a dance instead. What happened to Roy Choudhury is they were promoting Roy Choudhury and she danced his routine. When she starts getting close to another guy, they promote Roy Choudhury to support Roy Choudhury but she stayed with the other guy. But she's always been a dancer and always wanted to be in a dance company so she knows a lot about dance and is talented. 6d1f23a050
